## PROJECTS

### JobTrack – Job Application Tracking System

**Angular 21 | Laravel 12 | TypeScript | PHP | MySQL | AWS EC2 & RDS | GitHub Actions**

- Developed a full-stack job application tracking system with secure authentication, application management, dashboard analytics, status tracking, profile/settings, resume handling, and CSV export.
- Built a responsive Angular frontend and Laravel RESTful API, implementing protected routes, search/filter/sort functionality, application history, and MySQL data management.
- Deployed the application using AWS EC2, Amazon RDS, Nginx, and PHP-FPM, and integrated GitHub Actions CI/CD for automated frontend/backend build validation and deployment workflows.

### RentEase – Property Rental Management System

**React | Node.js | Express.js | MongoDB | Mongoose | JWT | REST API**

- Developed a full-stack MERN property rental platform supporting property discovery, tenant applications, lease management, and maintenance tracking.
- Implemented JWT authentication, role-based access control, property search/filtering, image uploads, favorites, and dedicated Tenant, Landlord, and Admin dashboards.
- Built responsive frontend interfaces and RESTful APIs using React, Node.js, Express.js, MongoDB, and Mongoose for end-to-end property and rental management.

**shopNOW – Multi-Vendor E-Commerce Platform**
**Next.js 15 | React 19 | Tailwind CSS | Redux Toolkit | Clerk | Prisma | Neon PostgreSQL**

- Developed a responsive multi-vendor e-commerce platform with dedicated customer, vendor, and admin workflows.
- Implemented product browsing, cart management, authentication, vendor store/product management, order management, and admin analytics dashboards.
- Integrated Clerk authentication, Redux Toolkit state management, Prisma with Neon PostgreSQL, Recharts analytics, and Framer Motion for a modern user experience.
